Product name: Anti-Mouse CD161/NK1.1 Monoclonal
Antibody(PerCP Conjugated)

Catalog: DL20030F

Synonyms: Killer cell lectin-like receptor subfamily B member
1C, Klrblc, CD161 antigen-like family member
C, Ly-55c, CD161/NK1.1, NKR-P1.9, NKR-P1C, NKR
-P1 40, CD161c

Background: NK-1.1 surface antigen, also known as
CD161b/CD161c and Ly-55, is encoded by the
NKR- P1B/NKR-P1C gene. It is expressed on NK
cells and NK-T cells in some mouse strains,
including C57BL/6, FVB/N, and NZB, but not AKR,
BALB/c, CBA/J, C3H, DBA/1, DBA/2, NOD, SJL,
and 129. Expression of NKR-P1C antigen has been
correlated with lysis of tumor cells in vitro and

rejection of bone marrow allografts in vivo. NK-1.1 has also been shown to play a role in NK cell activation, IFN- γ production, and cytotoxic granule release. NK-1.1 and DX5 are commonly used as mouse NK cell markers.

Form: Liquid

Isotype: Mouse IgG2a, κ

Size: 20 Tests/50 Tests/100 Tests/500 Tests

Host: Mouse

Reactivity: Mouse

Application: FCM

Concentration:

Conjugation: PerCP

SwissProt: P27814

Buffer: PBS with 0.05% Proclin300, 1% BSA

Recommended Use:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Data:

C57BL/6 murine splenocytes are stained with Anti-Mouse CD161/NK1.1 Monoclonal Antibody(PerCP Conjugated) and Anti-Mouse CD49b Monoclonal Antibody(AF488 Conjugated)(Left). Unstained splenocytes are used as control(Right).

Storage:

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
