Product name: Anti-Human CD16 Monoclonal Antibody(PE

Conjugated)

Catalog: DL20203F

Synonyms: Low affinity immunoglobulin gamma Fc region

receptor III-A,FCGR3A,CD16a antigen,Fc-gamma

RIII-alpha,Fc-gamma RIII,Fc-gamma

RIIIa,FcRIII,FcRIIIa,FcR-10,IgG Fc receptor

III-2,CD16a

Background: CD16 is known as low affinity IgG receptor III

(FcyRIII). It is expressed as two distinct forms

(CD16a and CD16b). CD16a (FcyRIIIA) is a 50-65 kD polypeptide-anchored transmembrane protein. It is expressed on the surface of NK cells, activated monocytes, macrophages, and placental trophoblasts

in humans. CD16b (FcyRIIIB) is a 48 kD

glycosylphosphatidylinositol (GPI)-anchored protein. Its extracellular domain is over 95% homologous to that of CD16a, and it is expressed specifically on neutrophils. CD16 binds aggregated IgG or IgG-antigen complex which functions in NK cell activation, phagocytosis, and antibody-dependent cell-mediated cytotoxicity (ADCC).

Form: Liquid **Isotype:** Mouse IgG1, κ

Size: **Host:** Mouse

20Tests/100Tests/100Tests×2

Reactivity: Human **Application:** FCM

Concentration: Conjugation: PE

SwissProt: P08637

Buffer: Phosphate buffered solution, pH 7.2, containing

0.09% stabilizer and 1% protein protectant.

Recommended Use:

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per

100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Data:

Human pheripheral blood cells are stained with Anti-Human CD16 Monoclonal Antibody(PE Conjugated)(filled gray histogram). Unstained pheripheral blood cells (blank black histogram) are used as control.

Storage:

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
