Product name: Anti-Human CD56 Monoclonal Antibody(APC
Conjugated)

Catalog: DL20214F

Synonyms: Neural cell adhesion molecule
1, NCAM1, N-CAM-1, NCAM-1, NCAM

Background: CD56 is a single transmembrane glycoprotein also known as NCAM (neural cell adhesion molecule), Leu-19, or NKH1. It is a member of the Ig superfamily. The 140 kD isoform is expressed on NK and NKT cells. CD56 is also expressed in the brain (cerebellum and cortex) and at neuromuscular junctions. Certain large granular lymphocyte (LGL) leukemias, small-cell lung carcinomas, neuronal derived tumors, myelomas, and myeloid leukemias also express CD56. CD56 plays a role in homophilic

and heterophilic adhesion via binding to itself or heparan sulfate.

Form: Liquid

Isotype: Mouse IgG2a, κ

Size:

Host: Mouse

20Tests/50Tests/100Tests/200Test

s

Reactivity: Human

Application: FCM

Concentration:

Conjugation: APC

SwissProt: P13591

Buffer: PBS with 0.05% Proclin300, 1% BSA

Recommended Use:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Data:

Human peripheral blood lymphocytes are stained with Anti-Human

CD56 Monoclonal Antibody(APC Conjugated)(filled gray histogram).
Unstained lymphocytes (empty black histogram) are used as control.

Storage:

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
