| Background:  | CD47, also known as Integrin-Associated Protein                        |  |  |
| U  | (IAP), is a membrane protein of about 50 kD with an                    |  |  |
| IgV-like extracelluluar domain, a five                             |  |  |  |
| membrane-spanning segment and a short terminal                     |  |  |  |
| cytoplasmic region. It is widely expressed on many                 |  |  |  |
| cell types and often associated with beta 3 integrins.             |  |  |  |
| It has been reported that CD47 functions as a self                 |  |  |  |
|  | marker. Red cells lacking CD47 were rapidly cleared                    |  |  |
|  | from the bloodstream by splenic macrophages. By                        |  |  |
|  | binding to SIRP $\alpha$ , CD47 controls hemostatic innate             |  |  |

| Buffer:                       | Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer. |                               |

## **Recommended Use:**

Each lot of this antibody is quality control tested by flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is  $\leq 2.0 \ \mu g \ per \ 10^6 \ cells$  in 100  $\mu L$  volume or 100  $\mu L$  of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

## **Storage:**

## **DEVELOP**.

Keep as concentrated solution.

Store at 2~8°C. Do not freeze.

This product is guaranteed up to one year from purchase.
