Product name: Anti-Mouse CD40 Monoclonal

Antibody(PE/Cyanine5.5 Conjugated)

Catalog: DL20445F

Synonyms: Tumor necrosis factor receptor superfamily member

5,Cd40,B-cell surface antigen CD40,Bp50,CD40L

receptor, CD40, Tnfrsf5

Background: CD40 is a 48 kD type I transmembrane glycoprotein

> also known as Bp50. It is a member of the tumor necrosis factor receptor (TNFR) superfamily and is

expressed on B cells, basal epithelial cells,

macrophages, follicular dendritic cells, endothelial

cells, and a subset of CD34+ hematopoietic

progenitors. CD40 regulates B cell

development/maturation, Ig isotype switching and, in combination with other signals such as IL-4, protects

B cells from surface Ig-induced apoptosis and promotes proliferation. Interaction of CD40 with its ligand CD154 (gp39), which is expressed on activated T cells, is important in costimulation and immune regulation.

Form: Liquid **Isotype:** Rat IgG2a, κ

Size: Host: Rat

50Tests/100Tests/100Tests×2

Application: FCM **Reactivity:** Mouse

Concentration: 5 µL Conjugation: PE/Cyanine5.5

SwissProt: P27512

Buffer: Phosphate buffered solution, pH 7.2, containing

0.09% stabilizer and 1% protein protectant.

Recommended Use:

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined

for individual use.

Storage:

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
