Product name: Anti-Human CD29 Monoclonal Antibody(Biotin

Conjugated)

Catalog: DL20677F

Synonyms: Integrin beta-1,ITB1,Itgb1,Fibronectin receptor

subunit beta, VLA-4 subunit beta, CD29

Background: CD29 is a 130 kD single chain type I glycoprotein

> also known as integrin β1, VLA-β chain, or gpIIa. It is broadly expressed on a majority of hematopoietic and non-hematopoietic cells, including leukocytes (although at low level on granulocytes), platelets, fibroblasts, endothelial cells, epithelial cells, and mast cells. CD29 is a member of the integrin family. It is non-covalently associated with integrin $\alpha 1-\alpha 6$

chains to form VLA-1 to VLA-6 molecules,

respectively. Integrins, which include CD29, bind to

several cell surface (e.g. VCAM-1, MadCAM-1) and extracellular matrix molecules. CD29 acts as a fibronectin receptor and is involved in a variety of cell-cell and cell-matrix interactions.

Form: Liquid **Isotype:** Mouse IgG1, κ

Size: 25µg/100µg Host: Mouse

Reactivity: Human **Application:** FCM

Concentration: 0.5 mg/mL **Conjugation:** Biotin

SwissProt: P05556

Buffer: Phosphate buffered solution, pH 7.2, containing

0.09% stabilizer and 1% protein protectant.

Recommended Use:

Each lot of this antibody is quality control tested by flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is $\leq 1.0 \,\mu g$ per 10^6 cells in $100 \,\mu L$ volume or $100 \,\mu L$ of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

Storage:

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
