| Product name:   | Anti-Human CD29 Monoclonal Antibody(APC   |  |  |
|   | Conjugated)   |  |  |
| Catalog:  | DL20680F  |  |  |
|   |   |  |  |
| Synonyms:   | Integrin beta-1,ITB1,Itgb1,Fibronectin receptor subunit beta,VLA-4 subunit beta,CD29                      |  |  |
|   |   |  |  |
|   |   |  |  |
| <b>Background:</b>  | CD29 is a 130 kD single chain type I glycoprotein<br>also known as integrin β1, VLA-β chain, or gpIIa. It |  |  |
|   |   |  |  |
| is broadly expressed on a majority of hematopoietic                 |   |  |  |
|   | and non-hematopoietic cells, including leukocytes   |  |  |
| (although at low level on granulocytes), platelets,                 |   |  |  |
| fibroblasts, endothelial cells, epithelial cells, and               |   |  |  |
| mast cells. CD29 is a member of the integrin family.                |   |  |  |
|   | It is non-covalently associated with integrin $\alpha 1-\alpha 6$   |  |  |
|   |   |  |  |
| chains to form VLA-1 to VLA-6 molecules,                            |   |  |  |
|   | respectively. Integrins, which include CD29, bind to  |  |  |
|   |   |  |  |

several cell surface (e.g. VCAM-1, MadCAM-1) and extracellular matrix molecules. CD29 acts as a fibronectin receptor and is involved in a variety of cell-cell and cell-matrix interactions.

| Form: Liquid                         |   | <b>Isotype:</b> Mouse IgG1, κ |
|--------------------------------------|---|-------------------------------|
| Size:<br>20Tests/100Tests/100Tests×2 |   | Host: Mouse                   |
| Reactivity: Human                    |   | Application: FCM              |
| Concentration: 5                     | μL  | Conjugation: APC              |
| SwissProt:                           | P05556  |                               |
| Buffer:                              | Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant. |                               |

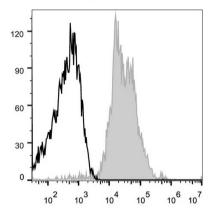

## **Recommended Use:**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

## Data:

Human peripheral blood lymphocytes are stained with Anti-Human CD29 Monoclonal Antibody(APC Conjugated)(filled gray histogram). Unstained lymphocytes (empty black histogram) are used as control.

## **Storage:**

Keep as concentrated solution.

Store at  $2\sim 8^{\circ}$ C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
