Product name:	Anti-Human CD55 Monoclonal Antibody(FITC	
	Conjugated)	
Catalog:	DL20818F	
Synonyms:	Complement decay-accelerating factor,CD55,CR,	
	DAF	
Background:	CD55 is a 60-70 kD glycosylphosphatidylinositol	
	(GPI)-anchored single chain glycoprotein also known	
	as decay-accelerating factor (DAF). It is expressed	
	on hematopoietic cells including erythrocytes and	
	many non-hematopoietic cells. CD55 accelerates the	
	dissociation of the components of the C3-convertases	
	(namely C2a from C4b in the C4bC2a complex, a	
	C3-convertase of the classical pathway, and factor	
	Bb from the C3bBb complex, a C3-convertase of the	
	alternative pathway) to protect cells from	

inappropriate damage caused by autologous complement. CD55 has been reported to reduce the efficiency of NK cell lysis and induce signal transduction in T cells. CD55 has also been shown to interact with CD97 and bind to Coxsackie and Echovirus.

Form: Liquid	Isotype: Mouse IgG1, κ
Size: 20 Tests/50 Tests/100	Host: Mouse
Tests/200 Tests	
Reactivity: Human	Application: FCM
Concentration:	Conjugation: FITC
SwissProt: P08174	

Buffer: PBS with 0.05% Proclin300, 1% BSA

Recommended Use:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ l staining volume or per 100 μ l of whole blood). Please check your vial before the experiment. Since applications vary, the

appropriate dilutions must be determined for individual use.

Storage:

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
