Product name: Anti-Mouse CD117 Monoclonal Antibody(FITC

Conjugated)

**Catalog:** DL21056F

**Synonyms:** Mast/stem cell growth factor receptor

Kit, Kit, SCFR, Proto-oncogene c-Kit, Tyrosine-protein

kinase Kit, CD117

**Background:** CD117 is a 145 kD immunoglobulin superfamily

member also known as c-Kit and stem cell factor

receptor (SCFR). It is a transmembrane

tyrosine-kinase receptor that binds the c-Kit ligand (also known as steel factor, stem cell factor, and mast

cell growth factor). CD117 is expressed on

hematopoietic stem cells (including multipotent hematopoietic stem cells, progenitors committed to myeloid and/or erythroid lineages, and T and B cell

precursors), mast cells, and acute myeloid leukemia (AML) cells. CD117 interaction with its ligand is critical for the development of hematopoietic stem cells

Form: Liquid **Isotype:** Rat IgG2b, κ

**Size:** 25µg/100µg Host: Rat

**Reactivity:** Mouse **Application:** FCM

**Concentration:** 0.5 mg/mL **Conjugation: FITC** 

**SwissProt**: P05532

**Buffer:** Phosphate buffered solution, pH 7.2, containing

0.09% stabilizer and 1% protein protectant.

## Recommended Use:

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1  $\mu g/10^6$  cells in 100  $\mu L$  volume].

## **Storage:**

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
