| Product name:   | Anti-Human CD8a Monoclonal Antibody(PerCP  |  |  |  |  |
|   | Conjugated)  |  |  |  |  |
| Catalog:  | DL21340F   |  |  |  |  |
|   |  |  |  |  |  |
| Synonyms:   | T-cell surface glycoprotein CD8 alpha<br>chain,CD8A,T-lymphocyte differentiation antigen<br>T8/Leu-2,MAL |  |  |  |  |
|   |  |  |  |  |  |
|   |  |  |  |  |  |
|   |  |  |  |  |  |
| <b>Background:</b>  | CD8a is a 32-34 kD type I glycoprotein. It forms a   |  |  |  |  |
| homodimer (CD8a/a) or heterodimer (CD8a/b) with                     |  |  |  |  |  |
|   | CD8b. CD8, also known as T8 and Leu2, is a   |  |  |  |  |
|   | member of the immunoglobulin superfamily found   |  |  |  |  |
|   | on the majority of thymocytes, a subset of peripheral  |  |  |  |  |
|   | blood T cells, and NK cells (which express almost  |  |  |  |  |
|   | exclusively CD8a homodimers). CD8 acts as a  |  |  |  |  |
|   | co-receptor with MHC class I-restricted T cell   |  |  |  |  |
|   | receptors in antigen recognition and T cell activation   |  |  |  |  |
|   |  |  |  |  |  |

www.dldevelop.com

| and has been shown to play a role in thymic           |
|---|
| differentiation. Two domains in CD8a are important    |
| for function: the extracellular IgSF domain binds the |
| $\alpha$ 3 domain of MHC class I and the cytoplasmic  |
| CXCP motif binds the tyrosine kinase p56 Lck.         |

| Form: Liquid                         |   | <b>Isotype:</b> Mouse IgG2a, κ |
|--------------------------------------|---|--------------------------------|
| Size:<br>20Tests/100Tests/100Tests×2 |   | Host: Mouse                    |
| Reactivity: Human                    |   | Application: FCM               |
| Concentration: 5 µL                  |   | Conjugation: PerCP             |
| SwissProt:                           | P01732  |                                |
| Buffer:                              | Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant. |                                |

## **Recommended Use:**

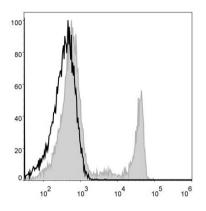

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined

## **DEVELOP**

for individual use.

## Data:

Human pheripheral blood cells are stained with Anti-Human CD8 Monoclonal Antibody(PercP Conjugated)(filled gray histogram). Unstained pheripheral blood cells (blank black histogram) are used as control.

## **Storage:**

Keep as concentrated solution.

Store at  $2 \sim 8^{\circ}$ C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
