Product name:	Anti-Human CD14 Monoclonal Antibody(PE		
	Conjugated)		
Catalog:	DL21464F		
Synonyms:	Monocyte differentiation antigen		
	CD14,CD14,Myeloid cell-specific leucine-rich		
	glycoprotein		
Background:	CD14 is a 53-55 kD glycosylphosphatidylinositol		
	(GPI)-linked membrane glycoprotein that is also		
	known as the LPS receptor. CD14 is expressed at		
	high levels on monocytes and macrophages, and at		
	lower levels on granulocytes. Some dendritic cell		
	populations such as interfollicular dendritic cells,		
	reticular dendritic cells, and Langerhans cells have		
	also been reported to express CD14. As a		
	high-affinity receptor for LPS, CD14 is involved in		

κ

the clearance of gram-negative pathogens and in the upregulation of adhesion molecules and cytokine expression in monocytes and neutrophils.

Form: Liquid		Isotype: Mouse IgG1,
Size: 20 Tests/50 Tests/100		Host: Mouse
Tests/200 Tests		
Reactivity: Human		Application: FCM
Concentration:		Conjugation: PE
SwissProt:	P08571	

PBS with 0.05% Proclin300, 1% BSA

Recommended Use:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 µl staining volume or per 100 µl of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Data:

Buffer:

Human pheripheral blood monocytes are stained with

www.dldevelop.com

Anti-Human CD14 Monoclonal Antibody(PE Conjugated)(filled gray histogram). Unstained pheripheral blood monocytes (blank black histogram) are used as control.

Storage:

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
