### Recommended Use:

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 µg/10<sup>6</sup>cells in 100 µL volume].

### Data:

C57BL/6 murine bone marrow cells are stained with Anti-Mouse Ly6C Monoclonal Antibody(PercP Conjugated)[Used at 0.2 µg/10<sup>6</sup> cells dilution](filled gray histogram). Unstained bone marrow cells (empty black histogram) are used as control.
