## **Recommended Use:**

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment.

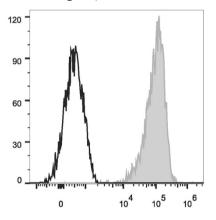

0.09% stabilizer and 1% protein protectant.

Since applications vary, the appropriate dilutions must be determined for individual use.

## Data:

PMA and ionomycin-stimulated (4h) Jurkat cells are stained with Anti-Human CD69 Monoclonal Antibody(PE Conjugated)(filled gray histogram) or Mouse IgG1,  $\kappa$  Isotype Control(PE Conjugated)(empty black histogram).

## **Storage:**

Keep as concentrated solution.

Store at  $2\sim 8^{\circ}$ C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
