Product name: Anti-Human CD326 Monoclonal Antibody(APC

Conjugated)

**Catalog:** DL21866F

**Synonyms:** GA733-2,M1S2,M4S1,MIC18,TACSTD1, TROP1

**Background:** CD326 is also known as Ep-CAM, tumor associated

calcium signal transducer 1, epithelial cell surface

antigen, epithelial glycoprotein 2, EGP2,

adenocarcinoma associated antigen, and TROP1.

CD326 is a type I transmembrane protein containing six disulfide bridges and one THYRO domain. This cell surface glycosylated 40 kD protein is highly expressed in bone marrow, colon, lung, and most

normal epithelial cells and is expressed on

carcinomas of gastrointestinal origin. Recently, it has been reported that CD326 expression occurs during

the early steps of erythrogenesis. CD326 functions as a homotypic calcium-independent cell adhesion molecule and is believed to be involved in carcinogenesis by its ability to induce genes involved in cellular metabolism and proliferation. CD326 antigen is an immunotherapeutic target for the treatment of human carcinomas.

Form: Liquid **Isotype:** Mouse IgG2b, κ

Size: **Host:** Mouse

20Tests/100Tests/100Tests×2

**Reactivity:** Human **Application:** FCM

Concentration: 5 µL **Conjugation:** APC

P16422 SwissProt:

**Buffer:** Phosphate buffered solution, pH 7.2, containing

0.09% stabilizer and 1% protein protectant.

## Recommended Use:

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per

100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

## **Storage:**

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
