Product name: Anti-Mouse Ly6A/E(Sca-1) Monoclonal

Antibody(PE/Cyanine7 Conjugated)

Catalog: DL22098F

Ly6a,Ly6,Ly-6A.2/Ly-6E.1,SCA-1,TAP **Synonyms:**

Background: Ly-6A/E, also known as Sca-1, is an 18 kD member

of the Ly-6 multigene family. Ly6A/E is a

glycosylphosphatidylinositol (GPI)-linked protein expressed on hematopoietic stem cells. In mice

expressing the Ly-6.2 haplotype (e.g., AKR, C57BL, C57BR, DBA/2, SJL, SWR, and 129), Ly-6A/E is also expressed on peripheral B lymphocytes and thymic and peripheral T lymphocytes. Strains expressing the Ly-6.1 haplotype (e.g., BALB/c,

CBA, C3H/He, DBA/1, and NZB) have low Ly-6A/E expression on resting peripheral lymphocytes. The

expression of Ly-6A/E on lymphocytes is upregulated upon activation from both Lv6.1 and Ly6.2 haplotype mice. Ly-6A/E is thought to be involved in the regulation of both T and B cell responses.

Form: Liquid Isotype: Rat IgG2a, κ

Size: Host: Rat

50Tests/100Tests/100Tests×2

Reactivity: Mouse **Application:** FCM

Concentration: 5 µL Conjugation: PE/Cyanine7

SwissProt: P05533

Buffer: Phosphate buffered solution, pH 7.2, containing

0.09% stabilizer and 1% protein protectant.

Recommended Use:

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined

for individual use.

Storage:

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
