Product name:	Anti-Mouse Ly6A/E(Sca-1) Monoclonal		
	Antibody(FITC Conjugated)		
Catalog:	DL22103F		
Synonyms:	Ly6a,Ly6,Ly-6A.2/Ly-6E.1,SCA-1,TAP		
Background:	Ly-6A/E, also known as Sca-1, is an 18 kD member		
	of the Ly-6 multigene family. Ly6A/E is a		
	glycosylphosphatidylinositol (GPI)-linked protein		
	expressed on hematopoietic stem cells. In mice		
	expressing the Ly-6.2 haplotype (e.g., AKR, C57BL,		
	C57BR, DBA/2, SJL, SWR, and 129), Ly-6A/E is		
	also expressed on peripheral B lymphocytes and		
	thymic and peripheral T lymphocytes. Strains		
	expressing the Ly-6.1 haplotype (e.g., BALB/c,		
	CBA, C3H/He, DBA/1, and NZB) have low Ly-6A/E		
	expression on resting peripheral lymphocytes. The		

expression of Ly-6A/E on lymphocytes is upregulated upon activation from both Ly6.1 and Ly6.2 haplotype mice. Ly-6A/E is thought to be involved in the regulation of both T and B cell responses.

Form: Liquid		Isotype: Rat IgG2a, κ
Size: 25µg/100µg		Host: Rat
Reactivity: Mouse		Application: FCM
Concentration: 0.5 mg/mL		Conjugation: FITC
SwissProt:	P05533	
Buffer:	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.	

Recommended Use:

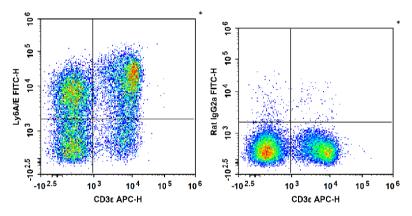

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1

DEVELOP

 $\mu g/10^6$ cells in 100 μL volume].

Data:

C57BL/6 murine splenocytes are stained with Anti-Mouse Ly6A/E(Sca-1) Monoclonal Antibody(FITC Conjugated)[Used at 0.6 μ g/10⁶ cells dilution](filled gray histogram). Unstained splenocytes (empty black histogram) are used as control.

Storage:

Keep as concentrated solution.

Store at $2 \sim 8^{\circ}$ C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
