Product name: Anti-Human CD11a Monoclonal Antibody(AF488

Conjugated)

Catalog: DL22237F

Synonyms: Integrin alpha-L,LFA-1A,CD11A,ITGAL

Background: CD11a is a 170-180 kD type I transmembrane

glycoprotein also known as LFA-1α chain and

integrin αL subunit. CD11a non-covalently

associates with integrin β2 (CD18) to form LFA-1. It is expressed on all leukocytes, including B and T lymphocytes, monocytes, macrophages, neutrophils,

basophils and eosinophils. It is absent on

non-hematopoietic tissues and platelets. CD11a plays a central role in leukocyte cell-cell interactions and is

important in lymphocyte costimulation.

CD11a/CD18 binds to ICAM-1 (CD54), ICAM-2

(CD102), and ICAM-3 (CD50).

Form: Liquid **Isotype:** Mouse IgG1, κ

Size: Host: Mouse

20Tests/100Tests/100Tests×2

Reactivity: Human **Application:** FCM

Concentration: 5 µL **Conjugation:** AF488

SwissProt: P20701

Phosphate buffered solution, pH 7.2, containing Buffer:

0.09% stabilizer and 1% protein protectant.

Recommended Use:

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Storage:

Keep as concentrated solution.

Store at 2~8°C and protected from prolonged exposure to light. Do not freeze.

This product is guaranteed up to one year from purchase.
