WB description:

Western blot analysis of NF-kappaB p65 (pS276) expression in HeLa TNFa-treated (A), mouse kidney (B), PC12 UV-treated (C) whole cell lysates.

IHC description:

Immunohistochemical analysis of NF-kappaB p65 (pS276) staining in human breast cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
