WB description:

Western blot analysis of ZNF496 expression in HEK293T (A), Raw264.7 (B), PC12 (C) whole cell lysates.

IHC description:

Immunohistochemical analysis of ZNF496 staining in human lung formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. AEC was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
