WB description:

Western blot analysis of LCK (pY505) expression in Jurkat (A), HeLa UV-treated (B) whole cell lysates.

IHC description:

Immunohistochemical analysis of LCK (pY505) staining in human lymphoma formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
