| Entrez Gene: | 7410 |
|---------------|---|
| SwissProt: | P52735 |
| Purification: | The antibody was purified by immunogen affinity chromatography. |
| Buffer: | Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide. |

WB description:

Western blot analysis of VAV2 (pY142) expression in A431 TNF-treated (A), HEK293T (B) whole cell lysates.

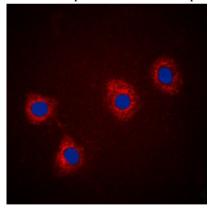

IHC description:

Immunohistochemical analysis of VAV2 (pY142) staining in human breast cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

IF/ICC description:

Immunofluorescent analysis of VAV2 (pY142) staining in A431 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary an

Storage:

Store at -20°C. Avoid repeated freeze / thaw cycles.
