Western blot analysis of LRRC41 expression in K562 (A), rat kidney (B), rat heart (C) whole cell lysates.

DEVELOP

IHC description:

Immunohistochemical analysis of LRRC41 staining in human prostate cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Storage:

Store at -20°C. Avoid repeated freeze / thaw cycles.
