Western blot analysis of QDPR expression in HL60 (A), SW620 (B), mouse liver (C), mouse brain (D), rat liver (E) whole cell lysates.

IHC description:

Immunohistochemical analysis of QDPR staining in human brain formalin fixed paraffin embedded tissue section. The section was

pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
